## 2a: Maps

We have developed following fetures in this Application

1. It will show the current location
2. Text field has been included in top of the map

3. A long press on a map location will create a new marker on the map ^
4. Info box has been created for the each marker
5. Sharepreferences has been used to store the data of the marker(latitude, longitude, Text)

2a: Map Polygons and Surface Area

1. Added functionality for calculating the area

Area of the inner courtyard of the "Stadtschloss" in Weimar
